Subject: Colour variants of the Weimaraner setter

The present correspondence of the American Weimaraner Club, same as the verbally transmitted coverage by your appointee Mrs. Helen Schulze, and furthermore the inspection of your Weimaraner magazines indicate the existence of a colour variant in the USA which is designated as "Blue Weimaraner".

The Deutsche Weimaraner Klub e.V.* , being the institution [*reponsible for*] defining the standard of this breed, concludes that such a colour variant cannot be approved. Neither is it intended to file an application for approval of this colour variant at the FCI (Fédération Cynologique Internationale).

Based on the good relationship with the local Weimaraner Club [*means the WCA*], we solicit you to breed our setter in the sense of the common standard only, as in the opposite case we will be obliged to dispose an import protection against all Weimaraner setters, including the non-german and overseas breeder associations related to ourselves.

For the clarification of the colour variants of our breed which are defined in the standard, we enclose 4 photographs (numbered from 1 - 4 and stamped with the core of the Commissary for Breeding and Examination, accompanied by his signature).

To Image 1	Weimaraner setter	SILVER GREY
To Image 2	Weimaraner setter	DEER GREY
To Image 3	Weimaraner setter	MOUSE GREY

To Image 4 (right part of the image): a setter described as "BLUE Weimaraner" by Mrs. Helen Schulze, which - presuming the consistency of the represented with the original colour shade - shall not be approved [*homologated*].

Referring to the Images 3 and 4 it is stated that these images have been supplied from within the USA to the Weimaraner Klub e.V. for response in 1966. At that time, the authenticity of the colour representation were disputed. These doubts henceforth have been dispelled by the given verbal declarations and are in accordance with the colour description by the owner [*female form*] (BLUE).

For : Letter to the President of the President of the American Weimaraner Club from
Sept. 27, 1970

Page 2

It is explicitly referred to the fact that, analogous to the colour variants *[possibilities]* within the standard, a relation to the colour of the claws and the eye colour exists.

The eye colour may not show a darker shade then dark amber (AMBER) and represents a yellowish shade of brown, emphasizing on yellow.
